Remote Management Services

Your IT Infrastructure, Managed Remotely with Expertise

At Oriflamme IT-Solutions, we provide comprehensive IT remote management services to ensure your business operates seamlessly and efficiently. Our solutions are tailored to meet the needs of businesses of all sizes, combining cutting-edge technology with a proactive approach to IT management.

Our Services

24/7 Monitoring & Support

We provide 24/7 IT infrastructure monitoring to detect and resolve issues proactively, ensuring optimal system performance and reliable support.

System Maintenance

Regular updates, patches, and maintenance ensure optimal server, network, and software performance.

Cloud Management

We remotely manage and optimize your cloud services for performance, security, scalability, and cost-efficiency, ensuring alignment with your business goals.

Firewall and Security Solutions

Installation, configuration, and management of robust security solutions to safeguard your network and data from external and internal threats.

IT AMC & Facility Management Services

We specialize in delivering **Annual Maintenance Contracts (AMC)** and **Facility Management Services (FMS)** to ensure business continuity and optimized IT operations.

- **Annual Maintenance Contracts (AMC):**

Our AMC solutions provide end-to-end support for computers, servers, networks, and IT assets. With proactive maintenance, troubleshooting, and security measures, we help businesses reduce downtime, control costs, and extend equipment lifecycle.

- **Scope:**

- Hardware & Software Support (installation, troubleshooting, repairs).
- Network Setup & Security (LAN/WAN, firewall, monitoring).
- Backup & Data Protection (setup, monitoring, recovery).
- Remote & Onsite Support (24x7 assistance, SLA-based visits).

- **Key Benefits:**

Reduced downtime, cost-effective maintenance, timely updates, and expert IT support.

- **Facility Management Services (FMS):**

Through dedicated on-site IT professionals, we offer seamless coordination, vendor management, and round-the-clock technical support. Our FMS solutions integrate people, processes, and technology to keep IT systems efficient, secure, and scalable.

- **Scope:**

- Infrastructure Management – Asset monitoring, preventive maintenance, inventory.
- Network Management – LAN/WAN setup, firewall & performance optimization.
- Helpdesk & Support – User support, ticketing, remote & onsite troubleshooting.
- Security Management – Antivirus, firewall monitoring, vulnerability checks.
- Backup & Data – Backup setup, monitoring, and recovery support.
- Reporting – Monthly health reports & improvement recommendations.

- **Key Benefits:**

- Hassle-free IT operations
- Cost-effective & transparent pricing
- Skilled IT experts & proactive monitoring
- Faster resolution & SLA-backed uptime

- **Virtual CIO Advisory:**

We align IT strategy with business goals through services such as IT audits, transformation roadmaps, risk & compliance management, disaster recovery planning, and cloud optimization.

- **Business Value Delivered:**

- Optimized IT performance & uptime
- Reduced operational costs
- Strengthened security & compliance
- Scalable & future-ready infrastructure
- Strategic decision-making support

Trusted by leading organizations, we ensure technology becomes an enabler of growth, efficiency, and innovation.

OUR FACILITIES

Managed IT Services

Managed IT services outsource tasks like network management, security, and support to experts, boosting efficiency, minimizing downtime, and allowing businesses to focus on core activities.

Networking Solutions

Networking solutions offer tools and technologies for secure, efficient connectivity and data management through hardware and software.

Virtualization

Virtualization enables multiple virtual machines to run on a single physical system, optimizing resources and cutting costs, making it essential for cloud computing and data centers.

OUR FACILITIES

Networking Security

Network security protects networks from threats using tools like firewalls and encryption to ensure data safety and prevent unauthorized access.

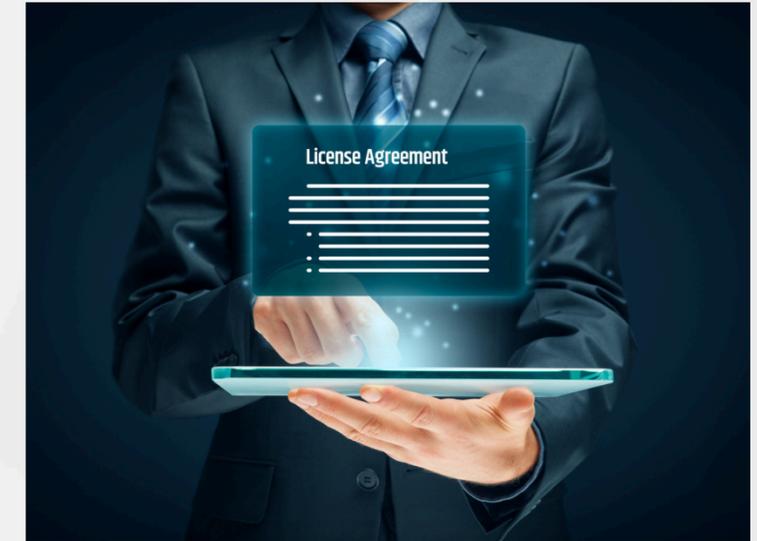

Cloud Technology

Cloud tech offers online storage and software, with scalability and cost efficiency via platforms like AWS, Azure, and Google Cloud.

Backup & Disaster Recovery

Backup and disaster recovery (BDR) protect data and ensure quick recovery after disruptions, minimizing downtime and data loss.

Licensing

IT licensing grants legal permission to use software, outlining usage limits and duration. It includes types like single-user, multi-user, and subscription licenses.

OUR FACILITIES

Video Surveillance

Video surveillance uses cameras to enhance security, deter crime, and provide evidence, though it raises privacy concerns.

Access Control

Access control ensures only authorized users can access resources, protecting data through authentication and authorization.

Attendance Solutions

Attendance solutions use technology to track and manage attendance efficiently, ensuring accuracy and productivity.

Intrusion Alarm

An intrusion alarm is a security system that detects unauthorized entry and triggers an alert to protect properties from intruders.

OUR SERVICES

IT Consulting

- Comprehensive IT strategy development
- Digital transformation consulting
- Technology assessment and recommendations

Cloud Solutions
